Slide 1

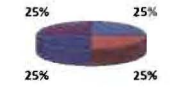
Using "Clickers" and Classroom Capture Technology to Increase Student Engagement

Prof. Woody Woodruff
Campbell University School of Law
March 4, 2012

Slide 2

I've taught law school for:

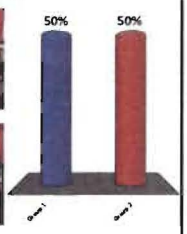
1. 1-5 years
2. 6-10 years
3. 11-15 years
4. > 15 years



Slide 3

Which group of students would you rather teach?

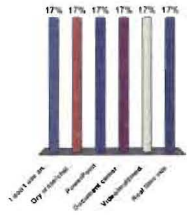
1. Group 1
2. Group 2



Slide 4

In a typical class the most sophisticated technology I use is:

1. I don't use any
2. Dry erase/chalk board
3. PowerPoint
4. Document camera
5. Video/multimedia
6. Real time internet connection



Slide 5

Student engagement in the classroom is more important than student note-taking:

1. True
2. False

Slide 6

If you "misspoke" during a class and stated a legal principle incorrectly, would you rather:

1. Blow it off and let the students sort it out
2. Determine exactly what you said and correct it
3. I never "misspeak"

Slide 7

Sharing class notes from year to year is:

1. Perfectly acceptable
2. Makes no difference
3. Rewards disengagement

Slide 8

Clicker as an Assessment Tool

- Pre-discussion Assessment
  - What do they already know about the topic?
  - What misconceptions do they have about the topic?
- During discussion Assessment
  - Are they getting it?
  - Can we move on to more complicated materials?
- Post-discussion Assessment
  - Have they grasped the basics of the topic?
  - Can they relate principles from this class to previous materials?

Slide 9

The process of authentication under FRE 901(a) refers to:

1. Making sure the exhibit is the original
2. ✓ Establishing that the exhibit is what the proponent claims it is
3. Determining whether the exhibit makes a fact of consequence more or less likely

Slide 10

- Murder trial. Detective testifies he found foot long butcher knife with chip out of the handle in Vic's back and says Ex 1 is the knife because Ex1 is same size and has same broken handle.

Slide 11

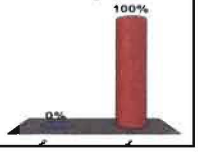
Has Ex 1 been authenticated?

1. Yes
2. No

Slide 12

42 USC § 1983 action v. police dept arising out of arrest of P. P offers tape recording of radio transmission claiming that Off. D says, "Run him over." After hearing D testify and listening to tape *in camera* judge excludes tape because, "the court was not satisfied that the voice on the tape was D's." The court's ruling was:

1. Correct
2. Incorrect



Slide 13

Audience Response: hardware
